Submitted on 20 Aug 2021

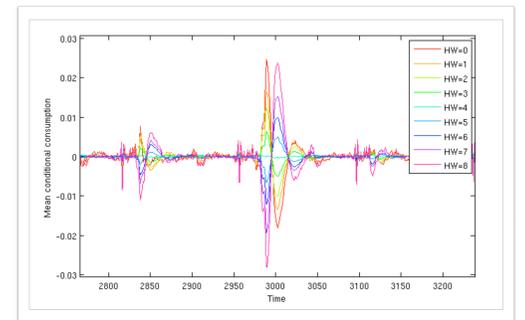

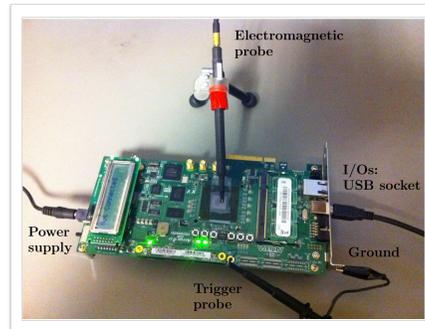

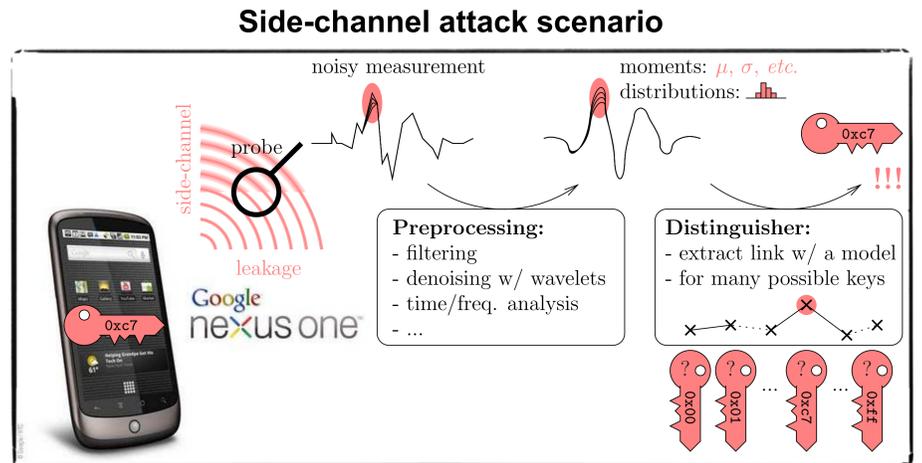

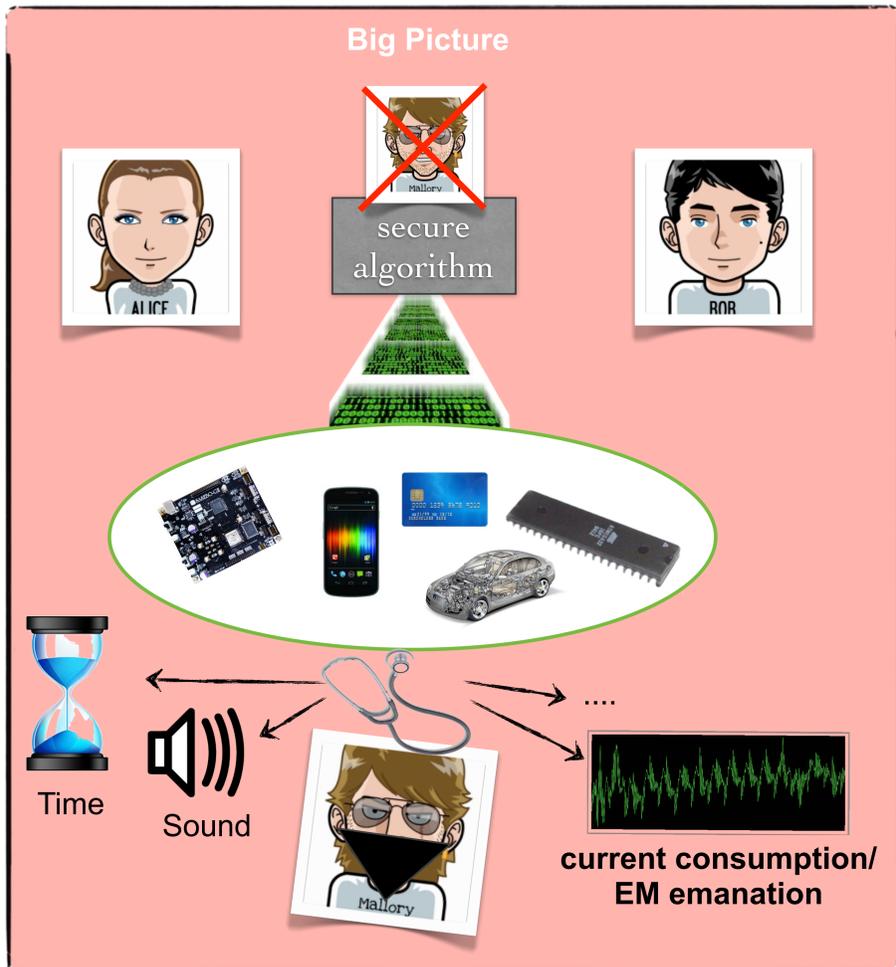

**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

## “Classical” side-channel attacks

### Open questions

- How to (fairly) compare side-channel distinguishers? [3]
- How to theoretically model side-channel attacks, e.g., with an information theoretic model?
- How to precisely (effectively) model the arising side-channel leakage from the device?

[1] Annelie Heuser, Michael Zohner: Intelligent Machine Homicide - Breaking Cryptographic Devices Using Support Vector Machines. COSADE 2012  
 [2] Annelie Heuser, Housseem Maghrebi, Sylvain Guilley, Olivier Rioul, Jean-Luc Danger: Mathematical and Empirical Comparison of Information-Theoretic Side-Channel Distinguishers (under submission)  
 [3] Annelie Heuser, Sylvain Guilley, Olivier Rioul: Success Metric: An all-in-one criterium for comparing side-channel distinguisher (in preparation)

**Profiled Side-channel distinguisher**

- Template Attack
- Stochastic Approach
- Support Vector Machines [1]

**Non-Profiled Side-channel distinguisher**

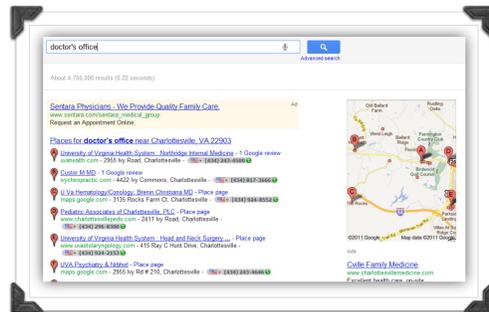

- Differential Power Analysis
- Correlation Power Analysis
- Mutual Information Analysis
- Inter-class Information Analysis [2]

## “Modern” Web Side-channel attacks

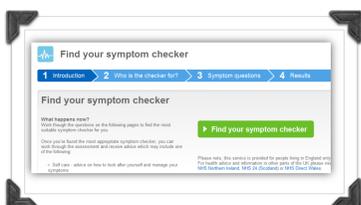

### Web side-channel scenarios
