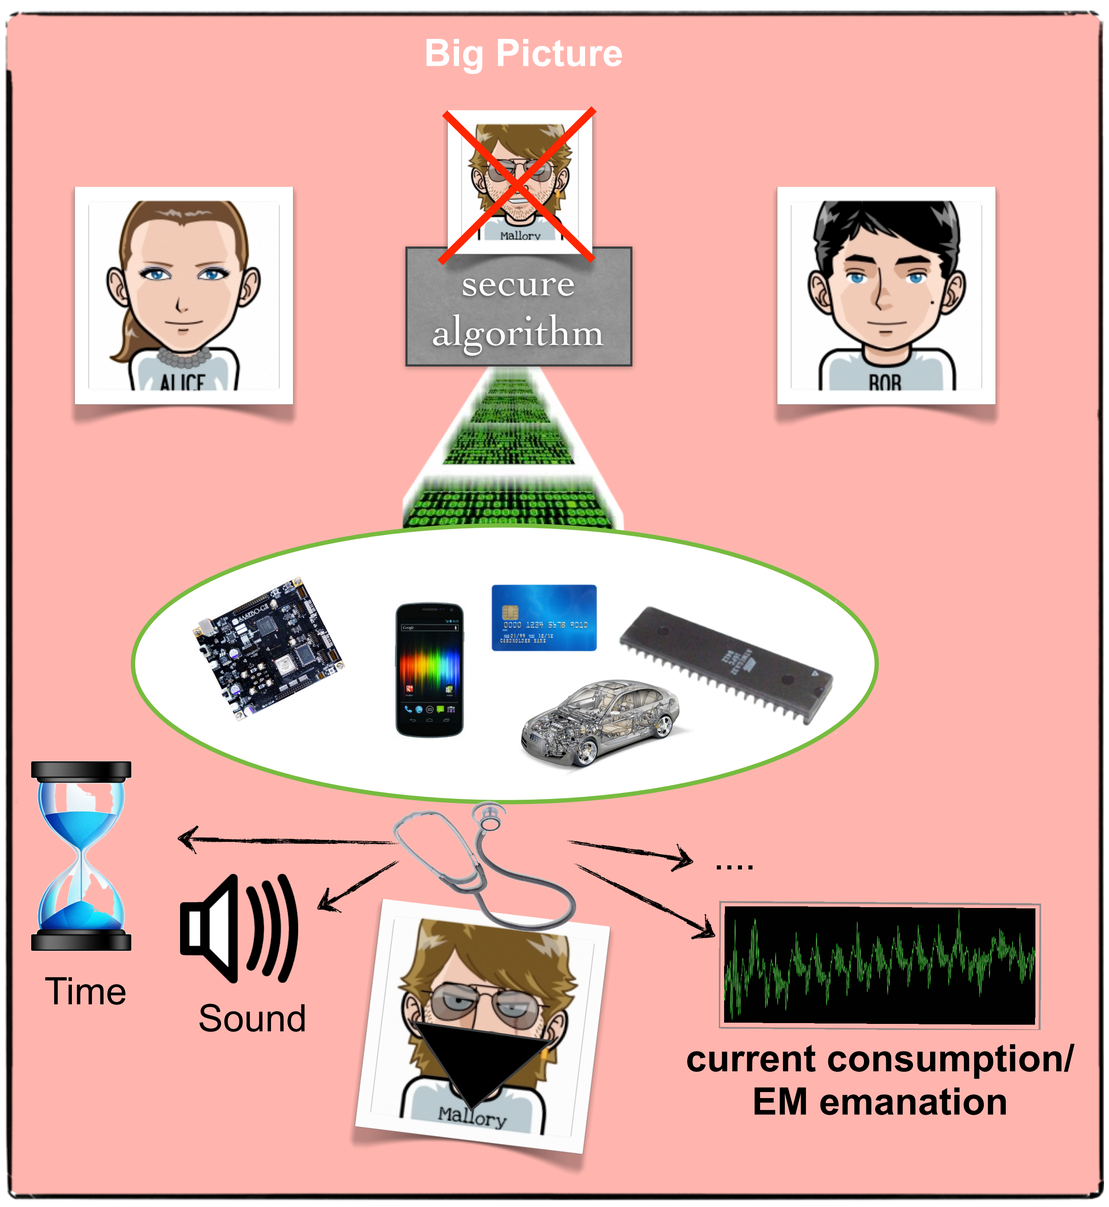
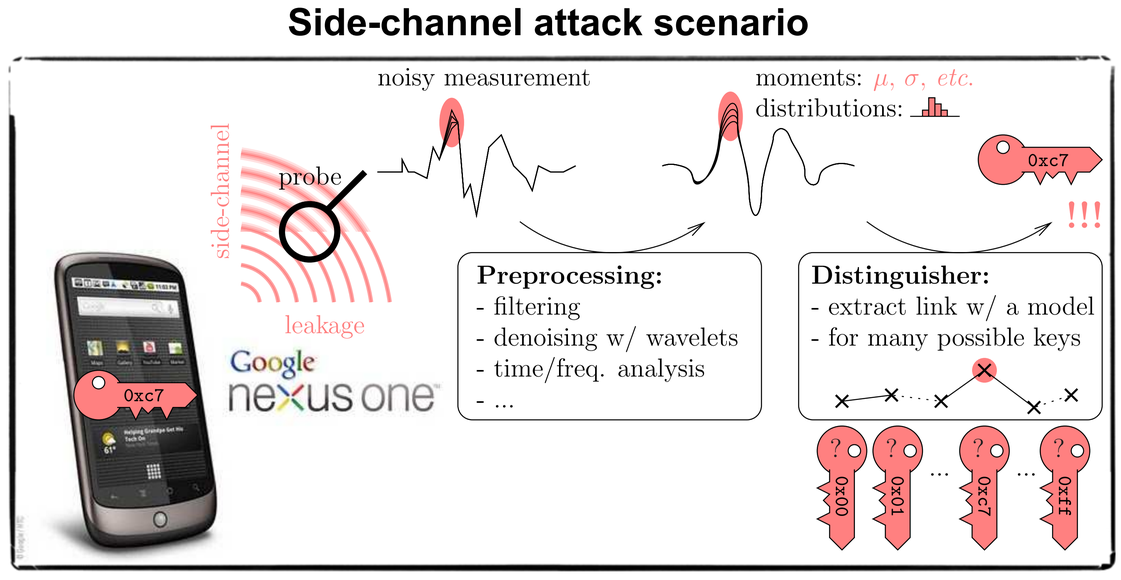
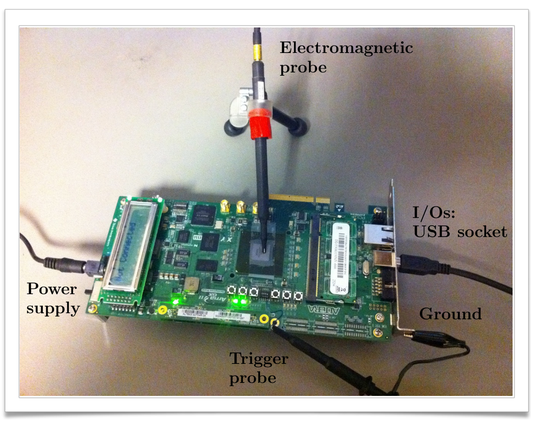
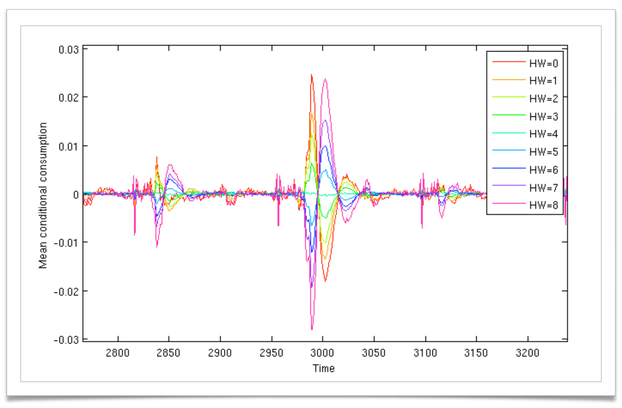
"Classical" side-channel attacks









Open questions

How to (fairly) compare side-channel distinguishers? [3]

How to theoretically model side-channel attacks, e.g., with an information theoretic model?

How to precisely (effectively) model the arising side-channel leakage from the device?

Profiled
Side-channel distinguisher

- Template Attack
- Stochastic Approach
- Support Vector Machines [1]

Non-Profiled
Side-channel distinguisher

- Differential Power Analysis
- Correlation Power Analysis
- Mutual Information Analysis
- Inter-class Information Analysis [2]
